WHY WE AGE — AND WHY WE DON'T HAVE TO ...

~ Lifespan ~

Written by Prof David A. Sinclair PhD

World Renowned Scientist

Prof. David Sinclair, PhD

The discoverer of NMN

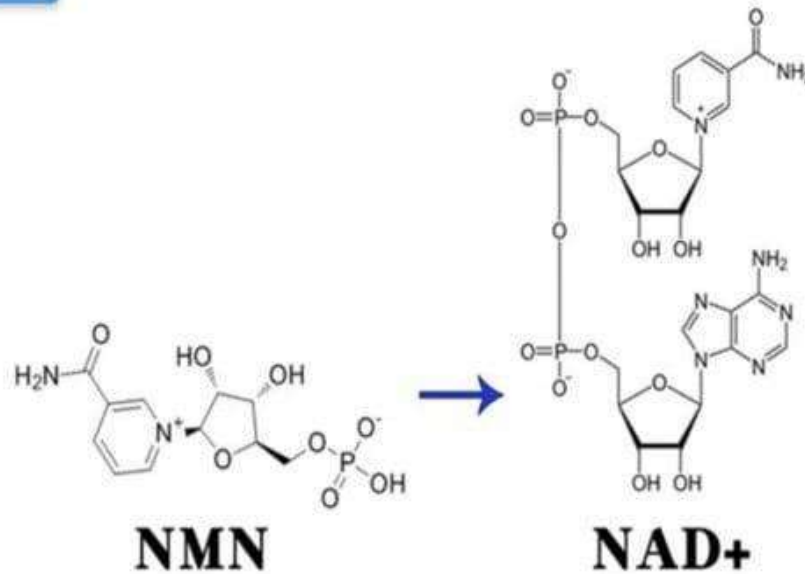

NMN(Nicotinamide MonoNucleotide) is the molecule that has been scientifically proven to reverse age and prolong life.

Prof. David Sinclair, a genetic professor in Harvard Medical School, and the discoverer of resveratrol and NMN (Nicotinamide MonoNucleotide)

Prof. David Sinclair was voted as the Time Magazine's Top 100 Most Influential People,
Time Magazine's Top 50 Health Care People,
NASA iTech Award Two-Time Winner

iHealth

NMN and NAD⁺

NMN is the precursor of NAD⁺.

Nicotinamide Monocleotide
(NMN)

Nicotinamide Adenine
Dinucleotide (NAD⁺)

NMN when taken orally, is
converted into NAD⁺ in
our cells which is
ESSENTIAL
to sustain life.

NMN and NAD⁺

NMN is the precursor of NAD⁺

NAD⁺

- Also known as Coenzyme, exists in every cell of human body.
- It is an indispensable component of our enzyme proteins in the body.
- It leads hundreds of life activities in our body and participates in
 - ✓ energy production
 - ✓ metabolism
 - ✓ glycolysis
 - ✓ DNA replication
 - ✓ And other life-sustaining activities

NMN when taken orally, is converted into NAD⁺ in our cells which is essential to sustain life.

A-TEAM

THE EFFECTS OF DIMINISHING NAD⁺ IN HUMAN BODY

Decreases in NAD Levels over age, causes –

- Metabolic dysfunctions
- Cardiovascular Diseases
- Neurodegenerative disorders
- Cancer

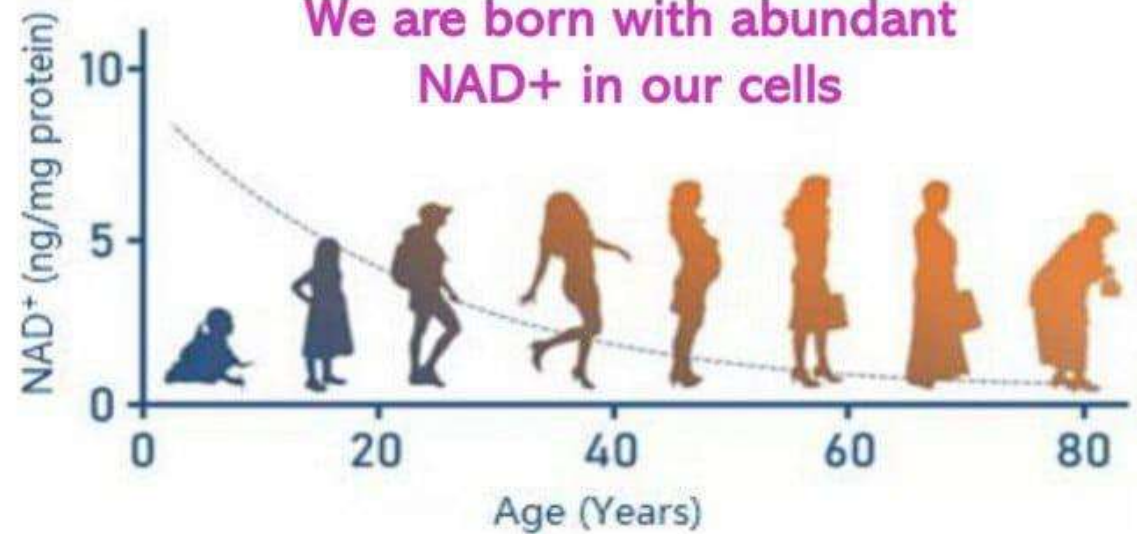

Without NAD⁺ in our body,
life ceases to exist

iHealth

NAD⁺ decline with aging

We are born with abundant
NAD⁺ in our cells

NAD⁺ Replenishment becomes necessary for health and overall wellbeing

A-TEAM

- We are a leading next generation American-based enterprise specialising in nutritional health and wellness products.
- iHealth uses the latest and scientific research results, formulas, and production technologies to develop the highest international manufacturing standards.
- We strive to be innovative and be the leader in setting the market trends of Longevity, Wellness, and Age-defying industries.
- We have now expanded to 50 countries, and the NMN produced, is the only NMN in the world that has obtained Eleven Major Certifications.
- We are Unparalleled in the world, Breakaway from the past and Embrace The Future

Major highlights of iHealth NMN

iHealth's NMN is one of the products in the world that has obtained nine major certifications.

PDR and FDA Certificate of Free Sale, which means our products are affirmed at the highest possible level in the United States.

cGMP is the highest certification that a pharmaceutical factory could possibly attain.

The vegetarian logo and halal certification represent our products are vegan certified and conform to Islamic religious values.

The four certifications of UL, HACCP, NSF, and MSDS attest to our products' safety.

The nine major certifications represent the safety and effectiveness of iHealth's NMN as the best in class.
